الاستراتيجية الوطنية للتعليم العالي
والبحث العلمي 2030

FGSSR Academic Study Platform

For a better educational experience for all postgraduate students

Faculty Vision & Quality Assurance

FGSSR aims for academic leadership by continuous technological progress and strict commitment to **Quality Assurance standards**, producing highly skilled graduates for the statistical and computational market.

Egypt's Vision 2030 (Digital Transformation)

The platform directly aligns with Egypt's **Vision 2030** for Higher Education by enabling digital transformation, unifying fragmented university services into a secure, smart, and fully integrated ecosystem.

Sustainable Development Goals (SDGs)

Supporting **SDG 4 (Quality Education)**, the platform replaces paper-based workflows with a highly sustainable digital learning environment, fostering seamless virtual collaboration and ensuring continuous education.

FGSSR

What's the problem? (Questionnaire)

جامعة القاهرة
كلية الدراسات العليا للبحوث الإحصائية

استبيان خاص بكلية الدراسات العليا للبحوث الإحصائية

هذا الاستبيان مستخدم في بحث لتحسين جودة الخدمات الطلابية على المستوى الإلكتروني للكلية ، و لقياس سهولة التواصل بينها وبين الطلاب من أجل تقديم دعم و مساعدة على مستوى رفيع .

FGSSR

Solution

FGSSR Academic Study Platform System

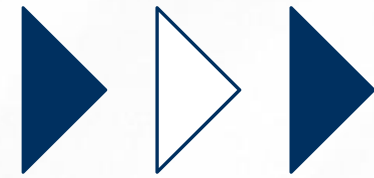

The waterfall model

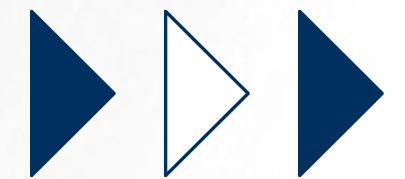

FGSSR

Non-Functional Requirements

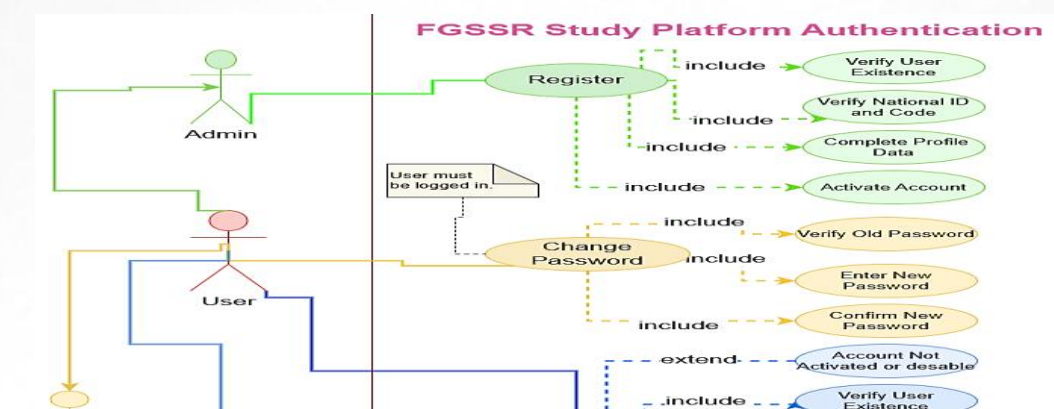

- 01 Security & Data Protection
- 02 Performance & Scalability
- 03 Usability & Accessibility
- 04 Maintainability & Reliability

Functional Requirements

- 01 User Authentication & Profile Management
- 02 Academic Program & Content Management (LMS/CMS)
- 03 Communication & Support (Chat)
- 04 Smart Notifications & Search Engines
- 05 Timetable & Scheduling Subsystems
- 06 Campus Venue & Place Management

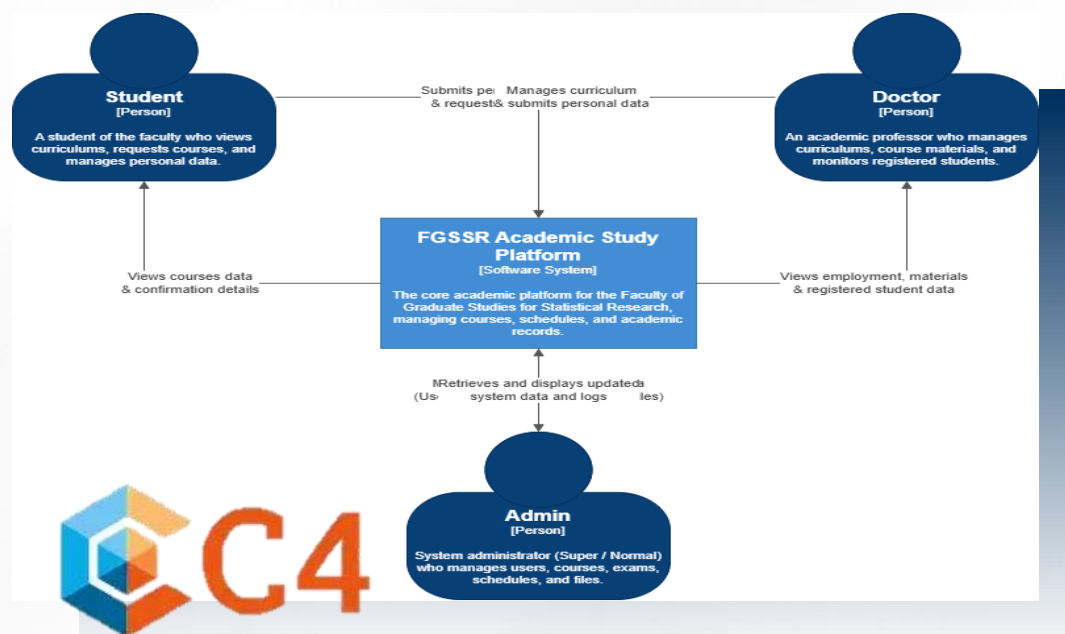

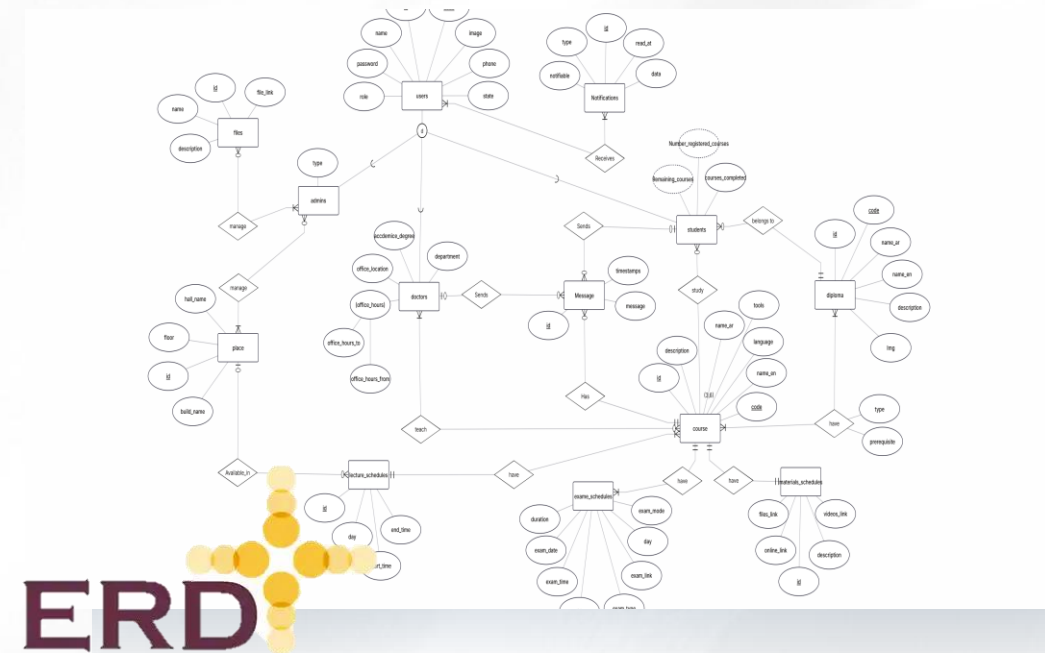

FGSSR

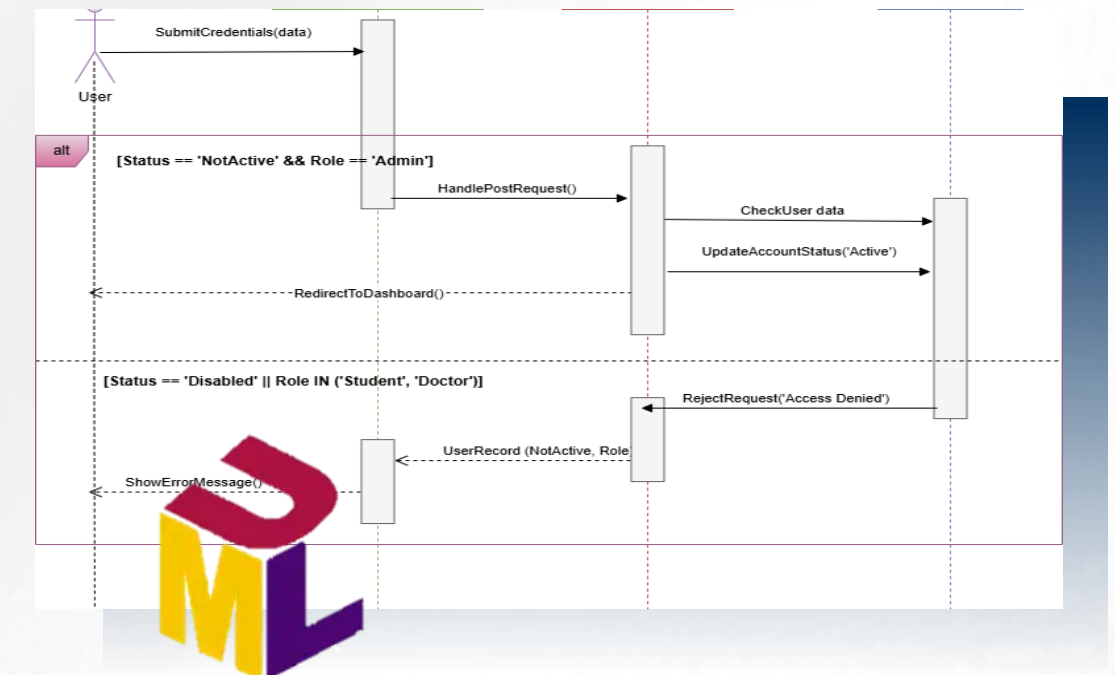

System and software design

Designed via the **C4 Model** across Context, Container, and Component layers. It maps system boundaries and internal Laravel modules to ensure scalability and easy maintenance.

Built on an ERD expanded into an EERD to enforce strict specialization and constraints. This blueprint was then formally mapped into highly optimized physical MySQL tables.

System operations are governed via four **UML structures** (Use Case, Activity, Sequence, and Component) to map multi-tier user roles, business logic workflows, and chronological MVC interactions.

ERD

MySQL

Implementation and testing

The platform was built using the Laravel MVC framework and MySQL, adhering to clean code standards. It underwent strict functional validation and unit testing to ensure system stability, security, and zero scheduling overlaps.

FGSSR

Future Development

- 01 Academic Analytics
- 02 Smart Attendance
- 03 Mobile Portability
- 04 Diplomas, Master's, and Ph.D. programs

شوات بوت الأسئلة الشائعة

كيف يمكنني التواصل مع دكتور المادة؟

هل يمكنني التسجيل مع دكتور مشروع التخرج من تلك المنصة؟

هل يمكنني معرفة نتيجة الامتحانات من على تلك المنصة؟

هل يمكنني التواصل مع شئون الطلاب؟

هل يمكن تسجيل المواد الدراسية من تلك المنصة ؟

لا يمكنك تسجيل المواد الدراسية من تلك المنصة عليك الدخول على منصة تسجيل المواد التالي : https://csds.cu.edu.eg/ISSR_Student/

hi

عذراً، لا أملك إجابة لهذا السؤال حالياً.
